# Day 3: Find the Day

Write a JavaScript function to get the day of a particular date.

**Recommended Reference**

W3 Schools has a nice tutorial on JavaScript dates.

Also, here's a useful YouTube video related to the topic:

**Input Format**

Several lines of input containing dates in *MM/DD/YYYY* format.
The program should end when it encounters $-1$.

**Output Format**

Print the day of the week indicated by the date for each line of input on a separate line.

**Sample Input**

```
10/11/2009
11/10/2010
-1
```

**Sample Output**

```
Sunday
Wednesday
```
