Day 3: Find the Second Largest Number in an Array

You are given N numbers. Store them in an array and find the second largest number.

Here are some useful videos related to arrays in JavaScript:

Also, W3 Schools has a nice, well summarized tutorial related to arrays in Javascript.

Input Format

The first line contains N, the size of array A.
The second line contains N space separated elements of array A.

Output Format

Output the value of the second largest number in array A.

Sample Input

```
5
2 3 6 6 5
```

Sample Output

5
